

## **Work Zone Cam Construction Camera Selected to Document Progress for New Lowertown Ballpark**

**New York, August 23, 2013** -- Work Zone Cam, a leading provider of construction webcam solutions, was chosen to document construction progress for the new Lowertown Ballpark in St. Paul, Minnesota. The new 7,000-seat ballpark will be the official home for the St. Paul Saints and will also host youth and amateur baseball teams from across the region.

The Work Zone Cam construction camera is hard at work documenting progress for the new ballpark from foundation to opening day in high definition megapixel imagery. Minneapolis-based developer and contractor, Ryan Companies, is sharing views of the project online via a public web page. The surrounding community and baseball fans of all ages can track progress and watch as the Lowertown neighborhood transforms.

The Lowertown Ballpark is part of the City of Saint Paul's efforts to revitalize the neighborhood. The new facility will replace the remaining section of the former Diamond Products/Gillette building. Offering more than just baseball, the facility will also host more than 100 non-baseball events annually, including outdoor concerts, movie nights and summer camps. The new ballpark will provide a significant economic boost to the Lowertown area, with an estimated 400,000 people expected to visit downtown St. Paul annually.

The \$63 million ballpark is slated for completion in Spring 2015. At the completion of the project, Work Zone Cam time-lapse specialists will hand-edit all of the captured jobsite images into a professional time-lapse movie. Viewers will be able to watch as the City of Saint Paul's vision comes to life.
